

New Product Introduction

Advanced Wound Care Dressings

This new wound care product line is designed to promote a moist environment, thereby accelerating the healing of many difficult-to-treat wounds or chronic wounds. Substances that help to provide ideal moisture conditions include alginate fiber, foam, and hydrocolloid dressings.

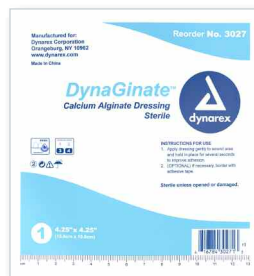

CuraFoam™ Foam Dressing

- Maintains a moist environment, while preventing bacterial contamination
- Used to manage minor and acute wounds – from ulcers to donor sites

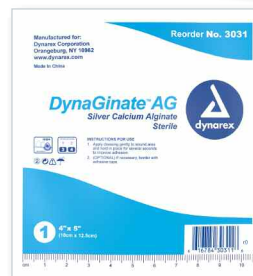

FoamFlex™ Non-Adhesive Waterproof Foam

- Sterile foam dressing with a semi-permeable film – prevents bacterial contamination
- Used for ulcers and low to moderate exuding wounds

DynaGinate™ Calcium Alginate Dressing

- Used as a topical wound dressing for moderate to high exuding wounds absorbing up to 17 times its own weight

DynaGinate™ AG Silver Calcium Alginate Dressing

- Provides 3 days of continuous antibacterial protection
- Used on infected wounds and wounds suspected of possible infection

DynaLevin™ Adhesive Waterproof Bordered Foam

- High absorbency while obtaining a moist environment
- Used to manage chronic and acute wounds
